

IMS Policy

Edgetech Europe GmbH is committed to implementing and maintaining an integrated system comprising elements of quality management, as well as environmental and energy management. Our stated goal is to improve the quality of our products to achieve the highest possible customer satisfaction. At the same time, we want to increase the sustainability of our production by improving environmental protection, conserving resources, and increasing our energy efficiency.

To achieve this, we commit to:

- Defining and pursuing appropriate goals.
- Providing all necessary information and resources to achieve the set goals.
- Continuously improving the integrated management system and our performance in the areas of quality, environment, and energy in an ongoing process.
- Fulfilling all binding obligations, including those arising from legal requirements and obligations towards our stakeholders.
- Protecting our environment and preventing environmental pollution.
- Considering energy efficiency and environmental impact during design and procurement.
- Promoting awareness of our product quality, our environmental performance, and our energy use and leading by example as a sustainable company.
- Conducting open and appropriate internal communication about our IMS.

Heinsberg, September 2024

Johann Artamonov, Managing Director
